

SAFETY MANAGEMENT SYSTEMS (SMS) — INTRODUCTION

Course Summary

Safety is the most important factor in any aviation operational discipline and it is essential that everyone involved has a clear understanding of how safety can be managed within their area of responsibility.

This introduction to Safety Management Systems provides a broad understanding of the need for safety management within an operational organisation and the essential components and framework of Safety Management Systems.

The framework taught in this course conforms to ICAO and EASA recommendations.

As a standalone course, this training is delivered in 1-5 days. However, Global ATS can combine all Safety Management training into a single three-week course.

Course Curriculum

- Components of a Safety Management System
- Framework of a Safety Management System

Who Is This Course For?

This course is designed for candidates looking to become an Air Traffic Management or Aviation Safety Management Specialist. However, it is equally valuable to Air Traffic Controllers and ATC Managers looking to broaden their understanding of Safety Management.

In addition, all candidates hoping to take this course must be able to demonstrate an excellent command of oral and written English, assessed to ICAO Level 4 English Language Proficiency at minimum

Course Duration
1-5 Days
