GLOBAL ATS
AVIATION TRAINING SERVICES.

RISK MANAGEMENT

Course Summary

Safety is the most important factor in any aviation operational discipline and it is essential that everyone involved has a clear understanding of how safety can be managed within their area of responsibility.

This course aims to supply candidates with a detailed explanation of safety risk management, which includes hazard identification, safety risk assessment, and the elaboration of appropriate mitigation measures. The course adopts relevant examples and practical application methodologies.

As a standalone course, this training is delivered in 1-5 days. However, Global ATS can combine all Safety Management training into a single three-week course.

Course Curriculum

- Hazard identification
- Safety Risk Assessments
- Hazard Mitigation Measures

Who Is This Course For?

This course is designed for candidates looking to become an Air Traffic Management or Aviation Safety Management Specialist. However, it is equally valuable to Air Traffic Controllers and ATC Managers looking to broaden their understanding of Safety Management.

In addition, all candidates hoping to take this course must be able to demonstrate an excellent command of oral and written English, assessed to ICAO Level 4 English Language Proficiency at minimum.

Course Duration
1-5 Days

Group Size
4-8 Students
per Course
