

COURSE PROSPECTUS
SAFETY ASSURANCE
DOCUMENTATION

Course Summary

Safety is the most important factor in any aviation operational discipline and it is essential that everyone involved has a clear understanding of how safety can be managed within their area of responsibility.

This course gives candidates detailed guidance on the compilation of safety assurance documentation, including safety manuals, safety assurance documents for procedural changes, and the creation of safety cases for equipment; all of which require regulatory approval prior to their introduction.

As a standalone course, this training is delivered in 1-5 days. However, Global ATS can combine all Safety Management training into a single three-week course.

Course Curriculum

- Safety Manuals
- Safety Assurance Documents
- Creating Safety cases for Equipment

Who Is This Course For?

This course is designed for candidates looking to become an Air Traffic Management or Aviation Safety Management Specialist. However, it is equally valuable to Air Traffic Controllers and ATC Managers looking to broaden their understanding of Safety Management.

In addition, all candidates hoping to take this course must be able to demonstrate an excellent command of oral and written English, assessed to ICAO Level 4 English Language Proficiency at minimum.

Course Duration
1-5 Days
