

Course Summary

Safety is the most important factor in any aviation operational discipline.

This course aims to supply candidates with a comprehensive understanding of the requirements and composition of an effective Safety Management System.

The course explores how to implement and improve safety management through safety monitoring and key performance targets, the introduction of a culture of safety, the impact of human behaviour, the value of an integrated quality management system, and how to promote safety awareness through training, education, and communication.

As a standalone course, this training is delivered in 1-5 days. However, Global ATS can combine all Safety Management training into a single three-week course.

Course Curriculum

- Safety Monitoring
- Setting Performance Targets
- Cultivating a Culture of Safety
- The Impact of Human Behaviour
- Integrated Quality Management Systems
- Promoting Self-Awareness

Course Duration
1-5 Days

Group Size
4-8 Students
per Course

Who Is This Course For?

This course is designed for candidates looking to become an Air Traffic Management or Aviation Safety Management Specialist. However, it is equally valuable to Air Traffic Controllers and ATC Managers looking to broaden their understanding of Safety Management.

In addition, all candidates hoping to take this course must be able to demonstrate an excellent command of oral and written English, assessed to ICAO Level 4 English Language Proficiency at minimum
