GLOBAL ATS
AVIATION TRAINING SERVICES.

HUMAN FACTORS

Course Summary

Safety is the most important factor in any aviation operational discipline and it is essential that everyone involved has a clear understanding of how safety can be managed within their area of responsibility.

This course serves as an introduction to the importance of Human Factor (HF) concepts, which describes human performance and how its failure can lead to incidents and accidents in an operational aviation environment.

The course adopts practical examples relevant to the operational environment of the aviation industry.

As a standalone course, this training is delivered in 1-5 days. However, Global ATS can combine all Safety Management training into a single three-week course.

Course Curriculum

- Human Performance
- The Link Between Performance and Incidents and Accidents

Who Is This Course For?

This course is designed for candidates looking to become an Air Traffic Management or Aviation Safety Management Specialist. However, it is equally valuable to Air Traffic Controllers and ATC Managers looking to broaden their understanding of Safety Management.

In addition, all candidates hoping to take this course must be able to demonstrate an excellent command of oral and written English, assessed to ICAO Level 4 English Language Proficiency at minimum.

Course Duration
1-5 Days

Group Size
4-8 Students
per Course
