

SAFETY MANAGEMENT SYSTEM (SMS) – AUDIT

Course Summary

Safety is the most important factor in any aviation operational discipline and it is essential that everyone involved has a clear understanding of how safety can be managed within their area of responsibility.

This course supplies candidates with an introduction to auditing techniques that provide a systematic and independent examination of an organisations Safety Management System as it applies to the necessary ICAO standards or EASA regulations.

This evidence-based exercise will provide a gap analysis leading to a detailed report of the findings together with recommendations for compliance.

As a standalone course, this training is delivered in 1-5 days. However, Global ATS can combine all Safety Management training into a single three-week course.

Course Curriculum

- Gap Analysis
- Report Generation
- Articulating Findings
- Creating Recommendations for Compliance

Who Is This Course For?

This course is designed for candidates looking to become an Air Traffic Management or Aviation Safety Management Specialist. However, it is equally valuable to Air Traffic Controllers and ATC Managers looking to broaden their understanding of Safety Management.

In addition, all candidates hoping to take this course must be able to demonstrate an excellent command of oral and written English, assessed to ICAO Level 4 English Language Proficiency at minimum.
