

FEAST TEST

Course Summary

The First European Air Traffic Control Selection Test (FEAST) assesses the knowledge, skills, and abilities of applicants for Air Traffic Control (ATC) training that are relevant for a career as an Air Traffic Controller.

The FEAST Service is a professional web-testing tool that improves the quality of decision making by ATC recruiters and contributes to an increased success rate of ATC trainees.

Since the introduction of the FEAST service, more than 55,000 candidates across more than 45 organisations have completed the test. At Global ATS, we're licensed to conduct these digital tests for candidates in Eurocontrol member states and candidates outside of Europe.

Course Curriculum

- A Set Of Cognitive Tests
- An English Language Test
- Air Traffic Control (ATC) Work Sample Tests
- The FEAST Personality Questionnaire

Who Is This Course For?

The FEAST service is ideal for those beginning to pursue a career as an Air Traffic Control, where aptitude assessments are strongly advised prior to the commencement of training.

Candidates hoping to sit the FEAST test must be able to present evidence of having achieved a minimum of ICAO Level 4 English Language Proficiency. Please refer to the EU Air Traffic Controller Licensing Directive for more information.

Individual

ASSISTANT COURSE

Course Summary

Global ATS' Assistant Course is designed to prepare candidates to carry out the role of an Air Traffic Control Assistant, incorporating airfield visits, practical instruction, written, and verbal tests.

The course runs at a relaxed pace, with candidates receiving a certificate to confirm their successful completion of the course at its conclusion.

Course Curriculum

- Role of an Air Traffic Control Assistant
- ICAO Overview
- Airspace Classification
- Basic Met and Nav
- Flight Rules
- Important Documentation
- Aerodrome Markings
- Air Traffic Flow management and Slot Times
- Phraseology
- Practical ATC Simulator

Who Is This Course For?

Global ATS' Air Traffic Control Assistant course is ideal for those looking to improve their prospects of securing an ATC Assistants role.

The course aims to provide the candidate with a holistic overview of the Air Traffic Control function.

No previous experience in the field of Air Traffic Control is required to undertake this course, though a demonstrable interest in the profession is desirable.
